Course Objective

This course, which is the continuation of the Introduction to University Life Course, aims to raise the competence of the student in subjects such as career planning, interview processes, image and communication and to highly qualified people. In addition, the course aims to provide students with the knowledge of science, technology, industry, developments in R & D, rational and critical thinking, reasoning ability, generating rational solutions and evaluating future business opportunities through various seminars. This course contributes to the development of the basic sciences in our country, giving students the opportunity to make applied research, renewing the existing knowledge and ideas, enriching and educating the elements needed by the profession branches. Main of the course is to make students become aware of the needs of the 21st century, thus be prepared to new business environment accordingly. Students will be advised some books, documentaries, podcasts etc. each week.

Learning Outcomes

The students who succeeded in this course will be able;

- To understand what kind of working environment is waiting for them
- To prepare a presentable CV and to ready for job interviews
- To become alert about sustainable and environmentally friendly business issues
- To be aware of 21st century skills and emergent career opportunities

Course Outline

Students will be given information about job market they will face after graduation. First of all, the laws and regulations they have to obey and their rights as workers will be discussed. Then students will be taught about recruitment processes including CV preparation, interviews, communication and image making methods as well. Career planning will be at the heart of this first period of the course including information about basic business management and entrepreneurship. In the second period students will be taught about Turkey and World economy. Industrial history of the world and expected future in the light of recent concepts like artificial intelligence and digital economies. Besides lives of celebrities of business and economic history and scientist will be discussed as well. At the end of the semester, students will be able to synthesize critically the information about history with the needs of the modern era to form a reasonable career path to themselves.

Policies and Procedures

https://www.ostimteknik.edu.tr/international-trade-and-finance-232

Exams: The exams aim at assessing various dimensions of learning: knowledge of concepts and theories and the ability to apply this knowledge to real-world phenomena, through analyzing the situation, distinguishing problems, and suggesting solutions. The written exams can be of two types, i.e. open-ended questions, which can also be in the form of problems or multiple-choice questions. The case could also be carried to the Dean's Office for additional disciplinary action.

Assignments: Quizzes and Homework (Assignments) might be applicable. Scientific Research Ethics Rules are very important while preparing assignments. The students should be careful about citing any material used from outside sources and reference them appropriately.

Missed exams: Any student missing an exam needs to bring an official medical report to be able to take a make-up exam. The medical report must be from a state hospital.

Projects: Not applicable

Attendance: Attendance requirements are announced at the beginning of the term. Students are usually expected to attend at least 70% of the classes during each term.

Objections: If the student observes a material error in his/her grade, he/she has the right to place an objection to the Faculty or the Department. The claim is examined and the student is notified about its outcome.
